

Case study

1000L Water Tank

Summary

Industrial Plastics completed the fabrication of a 1000 litre water tank for a repeat customer in Queensland. The rectangular tank required a double cross baffle strengthening system, stainer and dust cover, BSP pockets with sight glass and two lifting lugs. The tank was successfully transported to the satisfied customer.

Product Description

High-Density Polyethylene (HDPE), 15mm, Black, Water Tank; dimensions - 2m L x 1.2m W x 1.3m H.

Industry

Hydraulic Equipment

Location

Queensland, Australia
