

Case study

12,000ltr Chilled Water Tank

Summary

Industrial Plastics undertook the complete design and fabrication (in accordance with DVS 2205) of a 12,000 litre water tank for a commercial refrigeration company in Queensland. The cylindrical tank needed to be UV stabilised, insulated with 50mm PE50 foam (Black) and hydro tested. The tank was successfully delivered within 5 weeks to the satisfied customer.

Product Description

High-Density Polyethylene (HDPE), Black PE100, UV Stabilised, Water Tank; dimensions - 2.54m W x 3.0m High.

Industry

Commercial Refrigeration

Location

Queensland, Australia
