

Case study

110,000ltr Cylindrical Storage Tank

Summary

Industrial Plastics fabricated a large cylindrical water storage tank for a regional Queensland council. The 110,000 litre tank was fabricated to DVS standard and fitted with a manhole, 4x lifting lugs and 3x heavy duty anchors. Despite external obstacles in the delivery process, the project was successfully delivered to the customer.

Product Description

High-Density Polyethylene (HDPE), Black, PE100, Cylindrical Water Storage Tank; dimensions - 3.1m D x 15m H.

Industry

Queensland Council

Location

Queensland, Australia
