

Case study

5x HDPE Junctions

Summary

Industrial Plastics completed the fabrication of five HDPE junctions for a farming customer in Queensland. This project required different designs, specifications and fabrication techniques for the various HDPE junctions. The products were successfully delivered to the regional customers dam sites.

Product Description

High-Density Polyethylene (HDPE) Black, PE100, SDR17 Junction; dimensions - ranged 0.5m to 1m W x 0.5m to 3m L.

Industry

Farming

Location

Queensland, Australia
