

Case study

15,000ltr Molasses Mix Tank

Summary

Industrial Plastics completed the fabrication of a 15,000 litre cylindrical molasses mix tank for a liquid supplement company. The project required a conical bottom tank, custom roof specifications as well as assembling the tank legs on site for dimension positioning checking. The tank was also hydrostatic tested and certified for delivery.

Product Description

High-Density Polyethylene (HDPE), Black PE100,
Cylindrical Molasses Tank; dimensions - 3.5m D x 2.8m H.

Industry

Liquid Supplement

Location

Queensland, Australia
