

Case study

Paste Hopper Module

Summary

Industrial Plastics completed the design and fabrication of a paste hopper module for a pipe and welding customer. The project required stiffeners, a conical bottom tank, flanges, moulded access door and locating plates. This custom product was completed and delivered to regional New South Wales.

Product Description

High-Density Polyethylene (HDPE), Black PE100, 15mm Thick Paste Hopper module; dimensions - 1.95m W x 1.88m H.

Industry

Pipe Welding

Location

New South Wales, Australia
